

Composition 2(pr.el hadari)

-lecture 4 : writing an expository essay.

An expository writing aims at defining and giving information about a term or a concept or a person or an object or an idea or a belief or an animal. An expository essay is thus an essay that **defines, informs** and **explains**.

Can we imagine a dignified life without freedom of expression ? Can we build a democratic and just society without cherishing for liberty to say or write what we think and believe ? . The answer , i guess is a sharp 'NO'. **Freedom** of expression is an essential **human right** that all citizens should fully have and enjoy .It is the right of every individual to make their voices heard and understood .But this should not be seen as a green light to **infringe** upon others' right.

I :Freedom of expression is one of the most important basic human right .

A :It is an essential **pre-requisite /pre-condition** to the attainment of dignity.

B :It is necessary for the foundation / establishment of a democracy society.

C :It gives the chance to people **from all walks of life** to exchange their ideas freely and without any sort-type of constraints.

D :It allows citizens **to have a say in** issues of public opinion without fear of legal restraint .

E :It empowers people who believe in their ideas and opinion .

II : however , this freedom of expression does not provide 'carte blanche ' for people to say or write what they wish.

A :Laws forbid sharing speeches that **incite** violence .

B :Racist discourses have nothing to do with freedom of expression because they are morally banned and legally disallowed .

C :the same thing rings true for hate speeches which are **ethically** prohibited.

D :legal restraint or penalty is highly required in situation where the rights of others are infringed.

E :freedom of expression does not mean to say whatever to wish **to propitiate/appease** some people and upset others .

To conclude , one can fairly say that freedom of expression is an existential human –right , but it should not be **equated** with the full power to say or write what we like .Being absolutist and egoistic when it comes to freedom of expression can **spit venom** into human relationships and create frictions among people .**This is to suggest that** while enjoying the right to speak freely , its more **binding / or obligatory** to respect others and adhere to the conventionally accepted standards of conduct.

EXERCISE :write an essay about **ENTHANASIA**. these question might help you :

- what is ENTHANASIA ?
- why do some contries adopt it ?
- what do you think about it ?
